Share Your Innovations - Win an Award!

Take a minute and think about the work you do every day. Is there something that your locality has done that has created efficiencies, made a difference in providing service to your customers, or improved any aspect of government finance? If so, the VGFOA Memberships and Awards Committee invite you to share your locality's progress and success by applying for one of the coveted Awards for Innovations in Government Finance. In this time of cost cutting and attempting to maintain service levels with fewer resources, we all need to hear about and share good ideas that have been successful. Maybe it's your locality's time to shine!

Up to four awards will be given, based on the population size of the locality. Award categories include accounting, auditing and financial reporting; policies and procedures; cash management and investing; and e-government and technology. The on-line application, as well as complete details including all award categories, is available by [clicking here](#). The application deadline is July 15th, 2009. Winners will be notified by September 1st and awards will be presented at the fall VGFOA conference to be held October 21 through 23 in Charlottesville.

In 2008, both Fairfax County and York County received this prestigious award. Read on for descriptions of their award winning programs.

- Tenant Collection and Cash Management Process
County of Fairfax, Department of Housing and Community Development—
population over 100,000

This program was established to improve the customer service aspect of tenant rent collection and to improve the internal controls and efficiency of the process. The County replaced a manual process that had been in place for 40 years with an automated process that uses state-of-the-art collection and web technology. The old process required four staff persons to devote eighteen days each month manually posting about 1800 rent payments into a variety of accounting systems. Tenants were not able to confirm balances prior to payment, and it took days to resolve misdirected payments. The new process allows tenants to mail their checks to a lockbox where they are scanned and deposited the same day. An electronic file is sent the same day and downloaded into the tenants' accounts. It is then interfaced into the Housing Authority's financial management system. As a result of the new system, service is delivered more timely, customer service and accuracy is enhanced, interest earnings have increased since deposits are made quicker, internal controls are dramatically improved, and staff time has been refocused from manual processing to analysis which has increased tenant collections. Real dollar savings equal \$7,000 per month in staff time.

- Digital Check/Payment Package Lookup
County of York—population 60,000 to 100,000

This program was established to expand accuracy, accessibility and search ability within an existing digital imaging process for accounts payable payment documents. The old process required that specific information be manually entered into template fields and required the person retrieving the document to know the specific key information. In the new process, a copy of the actual payment is digitally uploaded and the search fields are electronically updated, thereby saving time, improving accuracy, and increasing the number of searchable fields. Documents may be retrieved by any employee in the County through a link on the County's Intranet and by entering one of five options: check number, vendor name, activity code, invoice number, or purchase order number. Savings have been realized in copy costs, storage costs, and staff time for filing and retrieval costs, as well as productivity. Real dollar savings for one year are estimated to be greater than \$10,000. The speed of retrieval and the elimination of departments maintaining duplicate document copies, as well as the copy-clarity and the improved accuracy has made this program a unique and beneficial system to every department and employee in the County.

GASB Issues Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions

On March 11, 2009, the Governmental Accounting Standards Board (GASB) issued Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This statement is intended to enhance the usefulness of fund balance information provided to financial statement users.

The most notable change brought about by the new pronouncement will be a shift from fund balance classifications established by NCGA Statement 1, *Governmental Accounting and Financial Reporting Principles*. Those classifications included an initial classification between reserved and unreserved portions of fund balance, as well as a secondary classification between designated

and undesignated portions of unreserved fund balance.

Under the new pronouncement, a two-tiered classification is maintained; however, the distinctions have changed. The initial classification now distinguishes between fund balance amounts that are "non-spendable" and those amounts which would be considered available for appropriation. "Non-spendable" fund balance includes amounts that are in non-spendable form, such as fund balance related to inventory or prepaid expenditures, as well as amounts that are legally or contractually required to be maintained intact.

The remaining fund balance amounts are considered spendable (though that specific title was removed from the final version of the pronouncement), and are further divided into four categories: restricted, committed, assigned, and unassigned. These categories are based on the nature and magnitude of the constraints imposed on fund balance amounts which stipulate the purposes for which the fund balance amount(s) can be expended.

The statement also provides clarification and interpretation of the various fund type definitions, with a goal of providing for more certainty and consistency in the way that activities are reported within the various fund types.

GASB Statement No. 54 is effective for financial statements for periods beginning after June 15, 2010; however, governments that wish to implement earlier than that date are encouraged to do so.

If you have a question or comment about GASB Statement No. 54, please contact John Wallingford at WALLINGJ@pwcs.edu or Jon Munch at jmunch@pwcgov.org.

OPEB Reporting and Disclosure Requirements

As the Phase II governments prepare to implement GASB 45 for the year ending June 30, 2009, the VGFOA Education Committee thought it might be useful to provide an overview of GASB 45's reporting and disclosure requirements and to provide examples of the financial statements, footnotes and required supplemental information from several Virginia governments. The overview and examples are available on the Association's website and may be accessed by [clicking here](#).

If you should have any questions please e-mail Vivian McGettigan, Chair of Committee, at vamcgettigan@co.hanover.va.us.
